

**Project Planning Phase**  
**Project Planning Template (Product Backlog, Sprint**  
**Planning, Stories, Story points)**

Date	18 October 2022
Team ID	PNT2022TMID15392
Project Name	Project – Personal Expense Tracker
Maximum Marks	8 Marks

**Product Backlog, Sprint Schedule, and Estimation (4 Marks)**

Use the below template to create a product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration	USN-1	As a user, I can register for the application by entering the email, password, age and confirm the password.	8	High	Dinesh, Deepak
Sprint-1	Login	USN-2	As a user, I can log into the application by entering my email and password	8	High	Dinesh, Srinivash
Sprint-2	Adding Expenses to an application.	USN-3	As a user, I can be entering the daily expense into the application	5	Medium	Gowarthanni, Deepak
Sprint-3	Edit and delete unwanted expenses.	USN-4	As a user, I can edit and delete the previously created expense	5	Medium	Dinesh, Gowarthnni.
Sprint-4	Producing output. Change the limit.	USN-5	As a user, I can see an old expense and if I need to set a monthly limit, we can set it on the application.	5	Medium	Deepak, Srinivash

### Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date(Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date(Actual)
Sprint-1	16	6 Days	24 Oct 2022	29 Oct 2022	16	29 Oct 2022
Sprint-2	5	6 Days	31 Oct 2022	05 Nov 2022	5	05 Nov 2022
Sprint-3	5	6 Days	07 Nov 2022	12 Nov 2022	5	12 Nov 2022
Sprint-4	5	6 Days	14 Nov 2022	19 Nov 2022	5	19 Nov 2022

#### Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

#### Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
